

# North Esk Irrigation Scheme

## Tranche Two

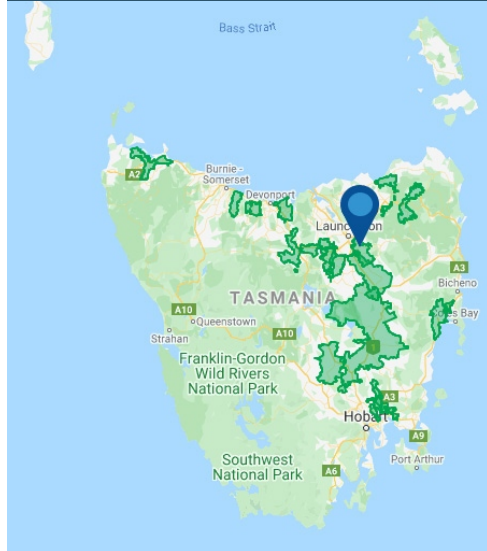

This region is a significant producer of quality horticultural products, in particular high quality grapes and is also one of the state's prime poppy growing regions. Increased production will also enhance the area's existing tourism industry which is primarily based around the wine industry

The North Esk Irrigation Scheme commenced operations in January 2019 and services the Relbia, White Hills, Evandale, Clarendon and Nile areas in Northern Tasmania. Water is harvested from the North Esk River at Watery Plains and transferred via an 8km pipeline to the 5,580 ML Rocklands Dam at White Hills.

The scheme's 59km of delivery pipelines are predominantly gravity-fed.

Towns / area serviced	Principal primary production focus of scheme	Length of irrigation season
Relbia, White Hills, Evandale, Clarendon and Nile	Poppies, vineyards, small seed, cereal and fodder production, livestock finishing	120-day summer delivery

<b>67</b> KMs of Pipeline	<b>1</b> Dam	<b>2</b> Pump Stations	<b>0</b> Power Stations
------------------------------	-----------------	---------------------------	----------------------------

<b>Approval</b>	November 2014
<b>Construction started</b>	November 2017
<b>Operations commenced</b>	January 2019
<b>Capacity</b>	4,680 ML
<b>Cost</b>	\$30.43 million
<b>Number of irrigators</b>	57
<b>Forecast opening</b>	November
<b>Forecast closing</b>	March
<b>Daily flow rate</b>	39.04 ML / day
<b>Initial water sales cost</b>	\$1,500 / ML
<b>Percentage of entitlements sold</b>	100%
<b>ML available to buy</b>	0
